EDUCATION

Southern University of Science and Technology (SUSTech)

Shenzhen, China

- M.Eng. in Computer Technology

Sept. 2024 - Present

Hefei University of Technology (HFUT)

Hefei, China

- B.Sc. in Applied Physics

Sept. 2019 - Jun 2023

RESEARCH EXPERIENCE

Graduate Student Research Assistant

2024 – Present

Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences

Shenzhen, China

Supervised by Prof. Xiangxin Li and Prof. Guanglin Li((Director, SIAIT, CAS))

- Developed an adaptive low-rank matrix completion framework (ALF-SVT) for robust HD-sEMG signal recovery under mixed-channel corruption and motion-interference conditions, improving signal reliability for upper-limb prosthetic interaction.
- Developed a temporal attention-guided Mixture-of-Modality-Experts (MoME) fusion framework for robust EMG-FMG multimodal hand gesture recognition, achieving high-accuracy gesture classification on amputee subjects and superior noise robustness against conventional multimodal fusion strategies.
- Developed a vision-guided full-arm prosthetic control framework integrating RGB-D visual perception and myoelectric interaction for coordinated reaching and grasping assistance, and evaluated user performance under different control strategies and task conditions.
- Conducted exploratory cortico-muscular coupling analysis in vision-guided prosthetic interaction tasks to investigate neural-muscular coordination patterns and human-factor-related changes in user control burden under different control modes.

SKILLS & INTERESTS

Biomedical signal processing, multimodal prosthetic control, pattern recognition, human-machine interaction, Python, MATLAB, PyTorch.

AWARDS

Second Prize, 2026 World Robot Contest – BCI Controlled Robot Contest	2026
First-Class Academic Scholarship, Southern University of Science and Technology	2025
Third Prize, National College Physics Experiment Competition, Hefei University of Technology	2022
